SOME OF THE ADVANTAGES OF BUYING FROM *Plumfield Nurseries . . .*

Years of experience in growing Nursery Stock and solving many of your planning problems. A large organization of trained help. Twelve of our employees have a total of 360 years' experience. Improved modern warehouse, ventilated and temperatures controlled, keeping stock in healthy growing condition. Modern equipment enables us to grow Nursery Stock that gives satisfaction to the most particular buyer. Our stock grown at Fremont, Nebraska, in clean, cultivated fields under ideal climatic conditions for replanting. A new Certificate of Inspection from State Inspector each year. Stock handled with the least possible exposure assuring high survival results. Low prices for fine quality guaranteed Nursery Stock.

HOW TO ORDER

Please name second choice. In case we are out of variety or grade wanted, this will help us to make prompt shipment.

PLEASE STATE HOW TO SHIP EXPRESS or FREIGHT CHARGES COLLECT

If mail shipment is desired, add 10% to order unless order is under \$2.00, then add 20c to cover special packing and postage.

Trees over 3 to 4 feet high must travel by Express, Truck or Freight.

Our NURSERY STOCK is grown on the best land in the Platte and Elkhorn valleys. We use modern machinery; have modern FROST-PROOF STORAGE, and life-long TRAINED HELP. Our office and packing grounds are located one block south of U. S. Highway No. 30, on Nye Avenue.

We extend you a personal invitation to visit our NURSERIES AND STORAGES at any time of the year.

OUR GUARANTEE

Our NURSERY STOCK is guaranteed to reach you in a healthy, growing condition. Stock that fails to show growth will be replaced, if notified by July 1st following delivery. After this date, we will replace at one-half the current price, if notified by October 1st, following delivery, F. O. B. our packing grounds.

Replacements will be made of same size as originally bought. Planting service at cost.

SHORTAGES OR COMPLAINTS MUST BE REPORTED AT ONCE

If any NURSERY STOCK proves untrue to description, we hold ourselves in readiness, on proper proof, to replace it or refund the amount paid, but we shall, in no case be liable for any sum greater than the amount originally received for said NURSERY STOCK.

Plumfield EVERGREENS

SPECIMEN STOCK

We offer one of the finest assortments of Evergreens in the West. They are all transplanted from time to time, to develop the required root system and pruned to give them shape. We invite you to visit our nursery and see our selections of Evergreens.

NOTE—Evergreens are dug with ball of earth and burlapped. They will be shipped by freight or truck unless otherwise instructed. Can not be mailed. The burlap, next to the earth, should be left on when planted. Low and spreading types of Evergreens are measured across.

The most popular and hardy Evergreens in the Middle West are the various types of Junipers. In form they vary from those growing flat on the ground to those growing 80 to 100 feet tall.

BALSAM FIR

Rapid grower. Color is dark green with lighter green on the underside.

2-2½ ft.	\$ 6.50
2½-3 ft.	7.50
3-3½ ft.	8.50
3½-4 ft.	9.50
4-4½ ft.	11.00
4½-5 ft.	13.00

CONCOLOR FIR

Has, silvery toned foliage, dull pointed needles, soft to touch. Grows compact and symmetrically making a very fine tree for the yard. Is also planted for wind-break protection. Will grow 6 to 12 inches a year when established. Ultimate height 50 to 60 feet. Roots deep where soil conditions permit—this habit aids in vigor. Needs little pruning, if any.

Plant Evergreens
for
Summer Beauty
and
Winter Coloring

Our Evergreens are all hardy varieties and will do well any place in the Mid-West. All new varieties introduced by us have been tested for a number of years and have proved very worthy. We have devoted much time in search of better types to propagate for this territory and are proud to offer the trade such good varieties as listed in this catalog, along with some of the older varieties which have been on the market for a number of years and speak for themselves.

Plumfield

PINES and SPRUCES

PINUS REGENSIS SYLVESTRIS
(Scotch Pine)

This variety has superiority over other Scotch Pines. Very hardy. Grows straight and fast, does well on light, dry soils. Grows from 12 to 18 inches a year. Ultimate height 60 to 80 feet. Foliage light green, needles 2 to 3 inches long, buds brown.

Plumfield **EVERGREENS** Juniper Varieties

JUNIPER CANNARTI

VIRGINIANA CANNARTI, Cannart's Red Cedar. 20-30 ft.

Foliage deep, rich green. Main stem very straight. Branches almost horizontal. Requires shearing to attain compactness.

2½-3 ft.	\$10.00
3-3½ ft.	11.00
3½-4 ft.	12.50

DUNDEE JUNIPER

VIRGINIANA PYRAMIDIFORMIS (Dundee Juniper).

Compact, symmetrical growth. Green foliage changing to purple in winter. A very desirable, pyramidal tree.

2½-3 ft.	\$10.00
3-3½ ft.	11.00
3½-4 ft.	12.50
4-4½ ft.	15.00

VIRGINIANA GLAUCA

VIRGINIANA GLAUCA, Silver Red Cedar. 15-20 ft.

An old variety. Pyramidal tree of moderate size. Silver blue color. Brightest in spring, darkening as season progresses. Stands trimming well.

2-2½ ft.	\$ 9.00
2½-3 ft.	10.00
3-3½ ft.	11.00

TAXUS CUSPIDATA, Spreading Yew—Spreading form. Dark green needles. Valuable for foundation planting.

15-18 in.	\$ 9.00	18-24 in.	\$10.50
----------------	----------------	----------------	----------------

AN EVERGREEN PLANTING

What Scopulorum Is and Why it Is Desirable

In brief, it is commonly known as Western Red Cedar or Silver Cedar and is native of Nebraska west of North Platte to the Rock Mountains. Its range north is through the Dakotas and Montana and south into New Mexico. This variety thrives where the annual moisture is only six to eight inches a year. It differs from our local Cedars as the foliage runs more to silver color and as a rule is more symmetrical and compact in habit. It played a very important part in furnishing fence posts and logs for cabins for the pioneers of the Northern Great Plain States. We find it most useful for this part of the country as it has a great ornamental value as well as for windbreaks and timber lots. You will note that we have selected some fine specimens for propagation and offering many of them as ornamental trees under Grafted Junipers.

Plumfield NEW GRAFTED

JUNIPER MOFFETI

Another wonderful tree selected from the Rocky mountains of Colorado and is a dandy tree. Foliage sharp, light greenish-silver color, tips of branches are more silver. Habit is upright and pyramidal, branches grow close together making a very dense tree. Grows about 12 inches a year. Can be sheared if desired.

JUNIPER WELCHI

The Welchi is the most satisfactory columnar type Scopulorum on the market today. Foliage is a light, evenly mixed greenish-silver. Leaves sharp but lay very close to the stem. Branches are very full and tufted at the base tapering out to a prominent point, yet they are sharply curved upward forming a fine outstanding columnar tree. Grows about one foot a year. Ultimate height 20 to 25 feet. Can be sheared if necessary.

JUNIPER GRACILIS

You will be well pleased with this tree. A compact grower, good silver color. Fairly soft foliage. The main stem is very straight and produces a good leader. will not require much trimming. This is one that you will really be proud to have in your planting.

Why We Grow Grafted Evergreens

Evergreens, like other varieties of trees, are being improved and we have devoted a number of years producing trees that are outstanding in color and habit of growth. To obtain these results we graft from trees that we have carefully selected and held under observation long enough to prove their superior qualities. Evergreens are often planted in pairs and in many cases one or more pairs are desired on a landscape planting. If grafted types are planted in pairs or in any amount of the same variety they will always grow and look alike. We can assure you that no finer grafted evergreens are produced than we offer in this catalog. The price of grafted evergreens is slightly higher than common seedling types as the cost of producing them is more.

FIELD OF PLUMFIELD EVERGREENS

EVERGREENS..... *Fremont, Nebraska*

JUNIPER PATHFINDER

This tree found favor almost instantly by reason of its outstanding silver foliage. It is upright in habit, full at base, limbs curved upward covered with shining silver-blue foliage making it an outstanding tree of the times. Will grow about one foot a year. Ultimate height 20 to 30 feet. You can shear this tree if necessary.

JUNIPER SILVER BEAUTY

A native of the San Isabel Forest region, and truly a beautiful tree. It is upright, full at base, branches have upward trend, foliage is greenish-silver, more silver on the exposed tips of branches. Grows about one foot a year. Ultimate height 20 to 30 feet. Can be sheared if necessary.

JUNIPER SUTHERLAND

This type of evergreen is definitely green in color as compared to the other varieties of Scopulorum. It is bushier in growth habit than the others, and consequently wider at the various given heights than is the case with other varieties of the same size. Its beauty in our opinion is to allow it to grow in a natural manner without shearing.

SPREADING JUNIPERS for Foundation and Border Plantings

SABINA JUNIPER

Grows a trifle more upright than Pfitzer with fan-shaped branches. Is equally as hardy and has deep green foliage. Withstands smoky conditions in cities.

PFITZER'S JUNIPER

(*Juniperus chinensis pfitzeriana*)

Exceptionally beautiful, graceful and hardy—no wonder it is one of the most popular. Handsome, feathery, gray-green foliage covers the arching, spreading branches as it develops its broad, picturesque form. Hardy everywhere, and does well in shade as well as sunlight.

Prostrate and Creeping Junipers for Ground Cover

JUNIPER ADMIRABILIS

This juniper belongs to a specie found in the Rocky Mountains. Its habit of growth is horizontal but it is so compact that it makes a solid mat of evergreen, covering the ground completely. Foliage bluish green. Grows 6 to 8 inches high. Spreads rapidly, yet retains its compactness. A very fine plant to use for covering graves, terraces or any place where a low beautiful covering is wanted.

ANDORRA JUNIPER

A horizontal juniper with grayish-green foliage turning to a reddish purple in early winter. Spreads rapidly, making a fine ground cover eight to ten inches high.

The above Junipers are used for terrace, rock garden and grave covering.

JUNIPER FILICINUS MINIMUS

This pretty little juniper is also a variety of the Rocky Mountains. It is one of the finest foliage evergreens of the juniper family. Its short horizontal limbs covered with delicate small branchlets forming fern shaped branches makes it a gem for the rock garden or any other place that a slow growing prostrate evergreen is desired. Grows 4 to 6 inches high, spreads slowly and is very compact. Green foliage.

JUNIPER LIVIDUS

This is another fine variety of the Rocky Mountain region. Foliage is bluish-green with a silver cast. Branches more slender but very well furnished and does make a remarkable plant. It grows 4 to 6 inches high and spreads reasonably fast, making it very desirable to use.

Available in 10-12 inch Bare Root, Packed in Moss at \$1.20 Each, 3 for \$3.00, Postpaid.

CREEPING JUNIPERS

GROUND COVERING CREEPING JUNIPERS

ROOTS WRAPPED IN MOSS

Beautiful evergreens. Grows about 6 inches high and forms a solid mat. Sometimes called Carpet Junipers. Very desirable for Permanent Grave Blankets, Rock Gardens and Terraces.

FIELD PICTURE

Largest and Finest Collection in the Mid-West

PLUMFIELD EVERGREENS

FOREST TREE SEEDLINGS . . .

for Woodlot and Windbreak Plantings

You will be doing a patriotic duty if you will plant trees of the right kind for protection against windstorms, for quick fence posts, for fuel, lumber and wild life coverage. We recommend Chinese Elm backed up with Cedar or Pine for quick and lasting windbreak. Many other varieties are as good or better, but not as fast developing. **FOR QUICK FENCE POSTS** plant Black Locust. Other varieties are good, but not as fast. **FOR QUICK FUEL** plant Cottonwood and Maple. For better fuel plant Elm, Ash, Oaks, Honey Locust, Hackberry.

Deciduous trees for windbreaks and timber lots, fence lines, lanes, etc. This kind of stock planted in rows on fence lines, and through cultivated field at intervals of 20 to 40 rods will pay greater dividends for the amount of money spent than any other improvement or operation that can be applied to cultivated fields.

Consult us for planting distances and varieties. Also ask your agricultural conservation committee about tree planting credits; it will pay you.

If sent by mail add 20c on less than \$2.00 orders. 10% on orders more than \$2.00. Otherwise we will ship best way, charges collect.

EVERGREENS for Windbreaks . . .

Think of them as matured and the protection they afford against the cold and hot winds. They are everlasting. Our Evergreens are dug fresh from the Evergreen beds at planting time and shipped immediately. The crucial time for Evergreens is usually July and August, following spring planting, therefore, they should be well protected, cultivated, mulched with straw, and watered through this period.

Evergreens cannot be packed with other stock, but will be shipped separate. As a rule the frost does not get out as soon.

TRANSPLANTING—These Evergreens have all been transplanted one or more times. The letter "T" following the size indicates the number of times transplanted. Transplanting is done to develop more fibrous roots which start much faster than large heavy tap roots. This class of stock will give you a better percentage of survival than stock not transplanted. For the fact these cannot be packed with other stock, we will ship POSTPAID.

FARMSTEAD WINDBREAK PLANTINGS

The pictures on this page of farmstead plantings are becoming common sights throughout the Midwest. We can think of no greater contribution toward the beautifying of our midwestern states than what these many farmstead plantings present us with. We must all remember that our complete livelihood depends upon the soil, therefore we must preserve it. Properly planted windbreaks pay good dividends. They protect against hot winds from burning up crops as well as carrying the top soil away. They protect livestock and farm buildings from cold winds and snow. Remember, wind dries out the soil and dry soil seldom produces profitable crops.

Farmstead Planting of Spruce and Pines.

Farmstead Windbreak of Evergreens showing method of planting.

The large Evergreens in this planting add a lot of beauty to this farm home, as well as stopping hard driving winds, also stops dust from gravel and dirt roads.

Lombardy Poplar Windbreak is one of our evergreen fields.

Chinese Elm background furnished much protection in our baby evergreen fields.

Protecting young shrubs in our field with an evergreen windbreak.

SOLID RED DELICIOUS

One of the most used fruits in the world. Can be easily grown, and should be planted extensively. Varieties we are listing are of the best sorts and recommended for this locality. You may make a selection of varieties and obtain quantity prices on Apples.

SUMMER VARIETIES

ANOKA—July to August: This variety fruits very young. Red and yellow striped.

DUCHESS—August. An old variety, but still one of the best. A good cooking apple.

EARLY HARVEST—July. The earliest summer apple. Pale yellow fruit.

EARLY McINTOSH—Two weeks later than Yellow Transparent. Handsome red color and pleasing taste. Good quality.

RED DUCHESS—All red color. Season and quality same as Duchess.

RED JUNE—Late July. Medium size, round, deep red fruit.

YELLOW TRANSPARENT—July to August. Fruits quite young. Large clear yellow.

FALL VARIETIES

FAMEUSE or SNOW—August. Light red fruit; delicious flavor.

WEALTHY—Early September. One of the old standard varieties. Bears young and is very hardy.

WINTER VARIETIES

CORTLAND—Deep red. Good commercial variety. Comes into bearing young.

DARK RED JONATHAN—The new dark red Jonathan. Colors two to three weeks earlier than Jonathan, and a deeper red.

RED DELICIOUS—Solid red. One of the most popular apples. Fruit large, flesh white, tender and juicy.

GRIMES GOLDEN—Rich golden color. An extra good all-round apple.

HARALSON—Solid red. Fruit is of excellent quality, and a good keeper.

DOLGO

THESE PRICES APPLY TO ALL VARIETIES OF APPLES AND CRAB APPLES AS LISTED BELOW.

WINTER VARIETIES, Continued

JONATHAN—Red. The best apple of all. Should be included in every planting.

PRAIRIE SPY—Wealthy shape, color red over yellow ground. Ready for use about Christmas. Very good quality and keeper. This apple has great promise.

NORTHWESTERN GREENING—Yellowish green. Flesh crisp and juicy. Very hardy.

WEALTHY—

STAYMEN WINESAP—Deep red. Good commercial variety.

WINESAP—Crimson. A medium sized apple of fine flavor.

YELLOW DELICIOUS—Golden yellow. Sweet, spicy flavor.

CRAB APPLE

DOLGO—Fiery red. Bears young and abundantly. Tree very ornamental.

WHITNEY—Light yellow striped red. Large fruit.

10% Discount on 25 or More Fruit Trees in One Order.

Other varieties of fruits, see pages 12 to 17.

Plumfield FRUIT TREES

Apricots

Apricots bloom early and many times are caught by frost. Heavy mulching after the ground freezes solid will retard their early blooming.

CHINESE—Yellow. Large fruit, and very hardy.

MOORPARK—Orange-yellow. Fruit large, with rich, sweet flavor.

SCOUT APRICOT—A Morden Manitoba, Canada, production.

Bears well. Fruit bronze gold color. Flesh yellow, freestone, tender, free of fibre and thin skinned. Very hardy.

SCOUT APRICOT

	Each	Lots of 4 each

9/16 in. caliper, 4-5 ft., standard.....	1.50	1.45
7/16 in. caliper, 3-4 ft.....	1.25	1.20

Cherries

There is no fruit tree more profitable than the Cherry, especially the sour varieties, which are very desirable for pies and canning. They bear fruit very soon after planting and bring good returns on your investment. Cherries are easily raised, as they are adaptable to almost any kind of soil, and should be planted in large enough quantities to insure plenty of this desirable fruit for the family. You may select varieties and obtain quantity prices.

SOUR CHERRIES

7/16 in. caliper, 3-4 ft.....	1.25	1.20

EARLY RICHMOND—Bright red. Earliest, and a good pie cherry.

ENGLISH MORELLO—Blackish red when fully ripe. Tart, but very rich for canning.

MONTMORENCY—Large; red. The best all-purpose cherry.

OSTHEIM—Black when ripe. Red meat inside. Excellent for canning.

SWEET CHERRIES

BLACK TARTARIAN—A big purple-black sweet cherry of fine flavor. Very juicy.

YELLOW GLASS—Golden yellow. A hardy and productive sweet cherry.

MINNESOTA HYBRIDS

MONITOR—August. Large. Red, very hardy and productive. High quality

UNDERWOOD—August. Large, rich, red, rather oval and juicy. One of the best.

GOLDEN EMBER—August and September. Good canning. Large rich golden yellow. Good keeper. Very hardy and productive.

SUPERIOR—Ripens over a long period. Large red fruit, yellow flesh, juicy and sweet. We recommend this variety.

NATIVE VARIETIES

OMAHA—August. Large, red and sweet. Productive and valuable.

HANSEN HYBRIDS

KAHINTA—August. Large red, yellow flesh. Very productive. Good quality.

TOKA—August. Large, red and very desirable. Similar to Hanska.

OPATA—July. Medium size. Fruit purplish-red, with green flesh.

WANETA—August. Large, red and very productive.

SAPA—July. Medium size. Fruit purple with red flesh. Juicy and very good. flesh.

Peaches

Next to Apples, Peaches are used for more purposes than most other fruits. Peaches picked from your own orchard are the finest flavored and best. One crop of fruit pays the grower many, many times the original cost of the trees. Peach can be profitably used as fillers in Apple orchards. We carry a long list of varieties and are listing only a few of the most popular.

	Each	Lots of 4 each

Raspberries

LATHAM RASPBERRIES

Raspberries do well in most any soil. It is best to plant them where they are protected from the hot summer winds as they ripen in July. Raspberries are a very profitable crop.

CUMBERLAND—Black. One of the most reliable varieties, and widely planted. 2-year old. 5 for \$1.00; 10 for \$1.90; 25 for \$4.35; 50 for \$8.00.

CHIEF—Red. About ten days earlier than Latham. Very productive. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

LATHAM—Red. A fine fruit for home or market. Large fruit, bears heavily. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

MORRISON BLACK RASPBERRY—This new raspberry is the largest ever grown. Has very few seeds. A vigorous grower and is rapidly gaining favor among berry growers. 5 for \$1.00; 10 for \$1.70; 25 for \$4.35; 50 for \$8.00.

CUMBERLAND

SODUS PURPLE RASPBERRY—This is the heaviest bearing of all raspberries. Does well in the Midwest and produced a good crop when many other varieties failed. Upright grower and produces large berries. This variety should not be overlooked as it is an all around berry and has a delicious flavor. 5 for \$1.00; 10 for \$1.90; 25 for \$4.35; 50 for \$8.00.

Strawberries

MASTODON

Home Grown JUNE-BEARING STRAWBERRIES

SENATOR DUNLAP—The best strawberry for home use. Large, well shaped berries of delicious flavor.

TAMARIX HISPIDA (Kashagar Tamarix)—Soft, feathery silver foliage. Bright pink flowers freely produced.
 18-24 in.....\$0.50 2-3 ft.....\$0.75
 3-4 ft. heavy.....1.00

HEDGING

A well cared for hedge brings to your home that distinguished touch of beauty and dignity. Formal hedges, such as Privet, should be pruned often throughout the summer.

Use the taller-growing Hedging shrubs to transform your back yard into an Outdoor Living-room with walls of living green. The tall hedge will give you privacy.

AMUR RIVET PRIVET

This is a lighter grade of stock than our standard grades but it is young, healthy stock and will do well.

PRIVET, AMUR RIVER—These are used almost exclusively for hedges.

	Per 10	Per 25	Per 100
12-18 inch light	\$1.50	\$3.25	\$12.50
12-18 inch heavy	1.75	4.00	15.00
18-24 inch	2.50	5.50	20.00

BARBERRY, THUNBERGI—Two-year-old seedlings.

	Per 10	Per 25	Per 100
9-12 inch	\$1.25	\$2.65	\$10.00
12-18 inch	1.75	4.00	15.00

HONEYSUCKLE—Makes a good tall hedge.

	Per 10	Per 25	Per 100
12-18 inch	\$2.00	\$4.00	\$15.00
18-24 inch	2.50	5.50	20.00

MULBERRY—(See Seedlings, page 9.)

SPIREA VANHOUTTE (Bridal Wreath)—Makes a nice hedge when trimmed.

	Per 10	Per 25	Per 100
10-15 inch	\$1.50	\$3.50	\$12.50
12-18 inch	2.00	4.50	16.00
18-24 inch	2.50	5.50	20.00

Plumfield SHADE

Plumfield shade and ornamental trees are first-class, well shaped, young and vigorous. Grown in soil that specially develops fibrous roots, which insures good results. All grades are based on standardized grades, where caliper and height are both important.

CUTLEAF WEEPING WHITE BIRCH

BIRCH, CUT LEAF WEEPING—A tall white-barked tree with gracefully drooping branches. Leaves deeply cut.

5-6 ft.	\$3.50
6-7 ft.	5.00
8-10 ft.	7.00

ASH, AMERICAN GREEN—Tall growing tree. Foliage dark green, changing to gorgeous shades of purple and yellow in fall.

5-6 ft.	\$1.25
6-8 ft.	1.75
8-10 ft.	2.50

AMERICAN ELM

ELM, AMERICAN WHITE—The grandest of all trees for this region. Tall wide-spreading tops.

5-6 ft.	\$1.10
6-8 ft.	1.50
8-10 ft.	2.00

**BEAUTY
COMFORT
PROTECTION**

ELM, VASE—A budded form of Elm, with graceful vase shape. Good for landscape and street planting.

5-6 ft.	\$1.75
6-8 ft.	2.25
8-10 ft.	3.00

MOLINE ELM

MOLINE ELM

The Moline Elm is a budded tree and is recommended for street and yard plantings where uniform trees are desired. Habit of growth is pyramidal. Very attractive large, waxy green leaves.

5-6 ft.	\$1.75
6-8 ft.	2.25
8-10 ft.	3.00

REDMOND LINDEN

HACKBERRY

HACKBERRY—Grows into a large tree, with luxuriant foliage. Limbs are seldom broken by wind.

5-6 ft.	\$1.50
6-8 ft.	2.50
8-10 ft.	3.50
10-12 ft.	4.50

LINDEN, AMERICAN (Basswood)—A tree of beautiful form and size, good for street or lawn planting. Fragrant, yellow flowers affording nectar for bees.

5-6 ft.	\$2.00
6-8 ft.	3.00
8-10 ft.	4.00

REDMOND LINDEN, Grafted tree, Crimean Basswood—Has an exceptionally straight trunk with branches growing close together on the trunk, making it very compact. Is a beautiful lawn or street tree.

5-6 ft.	\$2.25
6-8 ft.	3.50

**We Invite You to Visit Our
Nurseries and Sales Grounds.**

TREES *Fremont, Nebraska*

Grown in nursery rows, root pruned, transplanted and spaced to insure best root system and specimen trees.

Where caliper grades are shown, as 1 inch, 2 inch, 3 inch, etc., it means the diameter six inches above the ground.

HARD MAPLE

DECIDUOUS TREES WINDBREAKS

You will find varieties and prices listed on page 9.

LOCUST, THORNLESS HONEY—Same as Honey Locust but thornless. Makes a very good street or shade tree.

5-6 ft.....	\$1.50
6-8 ft.....	2.25

MAPLE, SCHWEDLER (Schwedleri) (Purple Leaf Maple)—40-50 ft. A perfectly shaped tree. Gleaming red and purple in spring. Purplish green in mid-summer and in autumn golden yellow.

6-8 ft.....	\$4.50
-------------	--------

MAPLE, SILVER (Soft Maple)—The fastest growing and largest of the maples. Leaves are silver underneath.

5-6 ft.....	\$1.25
6-8 ft.....	2.00
8-10 ft.....	3.00

 4-5 ft. **2.25**

FRUIT TREES AND FRUIT PLANTS
 PAGES 11 TO 17

HOW TO PLANT

In planting in yard, garden, or field, the ground should be well prepared, and stock should be handled with least possible exposure. We offer the following suggestions on some of the more important plants.

How to Plant Roses

How to Plant Balled Evergreens

Wrong Way

Right Way

To determine the number of plants required per acre for any distance multiply the two plant distances and divide the product into 43,560 (the number of square feet per acre).

PLANTING DISTANCE OF FRUIT TREES

	Usual recommended distance	Best average distance	Number Per acre at average distance		Usual recommended distance	Best average distance	Number Per acre at average distance
Apple	25 to 32 feet	30x30 feet	43	Blackberry	1 1/2 to 3x7 feet	2x7 feet	3110

HONEYSUCKLE VINE

CLEMATIS PANICULATA (Sweet scented Clematis)—Small fragrant white flowers freely produced in autumn.

2 year.....\$0.60 2 year heavy.....\$0.75

Large Flowering Clematis should be grown on trellises.

CLEMATIS HENRYI—Large white flowers.

Dormant Pot Plants.....\$1.00

CLEMATIS JACKMANI—Large purple flowers.

Dormant Pot Plants.....\$1.00

CLEMATIS MME. ED. ANDRE—Large red flowers.

Dormant Pot Plants.....\$1.00

CLEMATIS RAMONA—Large light blue flowers.

Dormant Pot Plants.....\$1.00

BIGNONIA RADICANS (Trumpet Vine)—A strong growing, hardy vine, good for pillars and fences. Large trumpet-shaped flowers, loved by humming birds.

2 year old.....\$0.50 3 year old.....\$0.65

CELESTRUS SCANDENS (Bittersweet)—A native twining vine. Large clusters of berries in fall, with orange husks and bright red berries.

2 year old.....\$0.50 3 year old.....\$0.65

AMPELOPSIS VEITCHII (Boston Ivy)—A graceful vine that clings tightly to stone or brick walls. Does best on the east or north. Glossy, three-lobed leaves.

2 year old.....\$0.65 3 year old.....\$0.85

AMPELOPSIS ENGELMANI (Engelman's Creeper)—A vigorous growing, clinging vine. Very hardy. Brilliant fall coloring.

2 year old.....\$0.50 3 year old.....\$0.65

WISTERIA AMERICAN (Frutescens)—Long clusters of lilac purple flowers in June and July. Much used on arbors and trellises.

2 year old.....\$0.50 3 year old.....\$0.65

HONEYSUCKLE HALLEANA—White blossoms fading to a deep yellow, produced in profusion over a long blooming season. Very fragrant.

2 year old.....\$0.50 3 year old.....\$0.65

HONEYSUCKLE, Lonicera (Gold Flame)—Everblooming honeysuckle, blooming from early summer until killing frost. Showy, tubular flowers with recurving petals flame red outside, bright yellow inside. Very fragrant and hardy.

2 year.....\$0.90

HECKROTTI—Everblooming trumpet-shaped flowers. Fragrant, bright red outside, yellow inside. Hardy.

2 year.....\$0.85

HONEYSUCKLE SEMPERVIRENS (Scarlet Trumpet)—Foliage of deep bluish green. Flowers are scarlet, freely produced.

2 year.....\$0.50

SILVER LACE VINE

POLYGONUM AUBERTI (China Fleecevine or Lace Vine)—Large feathery sprays of creamy white flowers produced in late summer and fall. Rapid grower.

2 year.....\$0.75 3 year.....\$0.90

We Solicit Your Inquiries for Varieties Not Listed.

Plumfield ROSES

CRIMSON BABY
BABY ROSES

2 year heavy, selected plants, \$1.00 each; 3 for \$2.90; 12 for \$10.00. 2 year standard plants, \$0.85 each; 3 for \$2.50; 12 for \$9.00.

BABY ROSES or DWARF POLYANTHA

CHATILLON—Vivid, light salmon pink, semi-double flowers in enormous heads.

DAGMAR SPAETH—Alabaster white edged pink.

EDITH CAVELL—Brilliant scarlet, overlaid velvety crimson.

ELLEN PAULSEN—Rather large, fairly full flowers of bright rose pink. Slightly fragrant.

EUTIN—Large clusters of very double, deep red flowers. Large flowers. Mildew resistant bush. One of the best.

GOLDEN SALMON SUPERIOR—Bright orange salmon. Blooms continually. An improvement on Golden Salmon.

GRUSS AN AACHEN—White tinted carmine, full double flowers.

IDEAL—Dark scarlet, borne in profusion. Immense, compact bunches. Vigorous and blooms continuously.

KAREN POULSEN—Large clusters of open scarlet blooms.

LAFAYETTE IMPROVED—Large clusters of bright cherry crimson.

POULSEN'S YELLOW—Bud, coppery, yellow flowers semi-double intensely fragrant.

ROSE ELFE—Very large, double, high centered, LaFrance pink. Cluster on long strong stems.

HYBRID PERPETUALS

2 year heavy, selected plants, \$1.00 each; 3 for \$2.90; 12 for \$10.00. 2 year standard plants, \$0.85 each; 3 for \$2.50; 12 for \$9.00.

More hardy than most of the Tea Roses. Do not bloom continuously but will bloom satisfactorily.

AMERICAN BEAUTY—A very popular cerise-red variety.

FRAU KARL DRUSCHKI—Very popular, large, pure white.

GENERAL JACQUEMINOT (Gen. Jack)—Old favorite, dark red garden rose.

PAUL NEYRON—Large rose pink flowers. Almost thornless.

PAUL'S SCARLET

CLIMBING ROSES

CLIMBING AMERICAN BEAUTY—Brilliant carmine red. 2 year select, \$1.00 each; 3 for \$2.90. 2 year standard, \$0.85 each; 3 for \$2.50.

PAUL'S SCARLET—Intense scarlet flowers of excellent shape and moderate size. Borne in small trusses. 2 year select, \$1.00 each; 3 for \$2.90. 2 year standard \$0.85 each; 3 for \$2.50.

CRIMSON RAMBLER—Deep crimson. 2 year select, \$0.90 each; 3 for \$2.60. 2 year standard \$0.75 each; 3 for \$2.40.

DOROTHY PERKINS—Shell pink. 2 year select, \$0.90 each; 3 for \$2.60. 2 year standard \$0.75 each; 3 for \$2.40.

GARDENIA—Rich creamy yellow. Borne in small sprays. 2 year select, \$0.90 each; 3 for \$2.60. 2 year standard, \$0.75 each; 3 for \$2.40.

F. J. GROOTENDORST

RUGOSA, RUGOSE HYBRID and MISCELLANEOUS ROSES

AUSTRIAN COPPER—Single, intense copper red, reverse of petals yellow. 2 to 3 ft. \$1.00 each; 3 for \$2.90. 18 to 24 inches \$0.85 each; 3 for \$2.50.

F. J. GROOTENDORST—Supreme double bright crimson in large clusters. 2 to 3 ft. \$1.00 each; 3 for \$2.90. 18-24 inches, \$0.85 each; 3 for \$2.50.

HUGONIS—Light yellow flowers borne profusely on slender branches. 2 to 3 ft., \$1.00 each; 3 for \$2.90. 18 to 24 inches, \$0.85 each; 3 for \$2.50.

Be sure to read our Planting Instructions, "How to Plant Your Roses." This is important if you expect to get a good survival.

Plumfield ROSES

PATENTED HYBRID TEA AND FLORIBUNDA ROSES

BETTER TIMES (Patent No. 23)—Brilliant cerise flowers, large, double fragrant blossoms. **\$1.35 each.**

CAPRISTRANO (Patent No. 992)—Rich shade of deep glowing rose pink, in the buds as well as in open flower. It retains its brilliant color throughout the life of the flower without fading. Produces large flowers on extra long, strong heavy stems. Blooms have a rich, lasting fragrance. All American rose selection for 1950. **\$2.00 each.**

CHARLOTTE ARMSTRONG (Patent No. 445)—Unique color with long slender blood-red buds opening in magnificent brilliantly colored open flowers. All American rose selection in 1941. **\$1.50 each.**

CRIMSON GLORY (Patent No. 105)—Color deep crimson, a "glory" Rose, glorious in its perfect form, large size and fragrant. **\$1.35 each.**

DIAMOND JUBILEE (Patent No. 824)—Double, high centered flowers of glowing buff-orange, with a touch of orange-yellow at base of petals. All American rose selection for 1948. **\$2.00 each.**

FORTY-NINER (Patent No. 792)—Brilliantly hued bi-color that justly secured an All American Rose Selection Award for 1949. Its contrasting colors are startling in their brilliance, and yet they blend together beautifully. Inside of petal is a vivid orient-red, while the outside is a chrome-yellow, changing to straw-yellow. The long buds open to a well shaped bloom of 25 to 40 petals. Mildly fragrant. **\$1.75 each.**

LOWELL THOMAS (Patent No. 595)—Bud large, long pointed; flower large, very double (35 to 40 petals) high centered, lasting, clear canary-yellow, on long stem. Vigorous, compact, bushy plants; upright, intermittent bloomer. All American rose selection for 1944. **\$1.50 each**

MIRANDY (Patent No. 632)—First place winner of All American rose selection for 1945. A strong free-branching plant producing large, long-pointed ovoid buds of rich dark red with black shadings, opening to Chrysanthemum-red. The flower of 50 petals displays new beauties of form and is long lasting. Fragrant. **\$1.50 each.**

MISSION BELLS (Patent No. 928)—Deep glowing salmon, which opens to clear shrimp pink color. Vigorous, heavily branched plants are abundantly clothed with disease resisting coppery green foliage. The buds are pointed and open to high centered flowers which often measure 5½ inches across. All American award for 1950. **\$2.00 each.**

NEW YORKER (Patent No. 823)—Brilliant red, with color long lasting and sun resistant. Plant is sturdy, upright and vigorous. The buds slowly open into very large flowers, often measuring 6½ inches across. Of scarlet with rose red undertones and overlaid with rich velvety-sheen. **\$2.00 each.**

PEACE (Patent No. 591)—Ovoid buds and golden-yellow etched with pink as they open, color changes from canary-yellow, to pale golden. Petals are edged with apple-blossom pink that deepens as the flower slowly opens to glorious 5 inch blooms. All American award for 1946. **\$2.00 each.**

ROSE OF FREEDOM (Patent No. 791)—Winner City of Portland Award for 1947. A hybrid Tea with beautiful 60 to 70 petaled, long-stemmed, currant-red blooms with delightful true rose fragrance. Blooms are normally borne on strong straight 28 to 32 inch stems. New wood usually thornless. A free bloomer and disease resistant foliage. Highest scoring red rose in 1946 and 1947 nation wide trials. **\$1.50 each.**

SUTTER'S GOLD (Patent No. 885)—Beautiful, long-pointed, yellow bud, richly shaded with orange and red. Rich tea fragrance not found in any other yellow rose. The 24-petaled flowers are high-centered and richly colored. All American award for 1950. **\$2.00 each.**

TALLYHO (Patent No. 828)—A bright color but the contrast is not great. The color on the inside of the petals is a varying but always a delightful and unique shade of pink. The outside of the petals is a rich crimson. The buds, before they unfold, are deep cardinal red. The long-stemmed blooms open slowly and last exceedingly well because they have such heavy substance. They are very large when fully open, of perfect form and with spicy fragrance. All American award for 1949. **\$1.75 each.**

TEXAS CENTENNIAL (Patent No. 162)—Hoover sport. Bright vermilion red with light tone of gold at base. Petals lighter red at center, gradually toning to deep rich pink as the bloom ages. **\$1.25 each.**

WILL ROGERS (Patent No. 256)—Dark velvety-crimson maroon, double, free bloomer. Strong vigorous dark green foliage. **\$1.25 each**

FLORIBUNDA ROSES

BETTY PRIOR (Patent No. 340)—Produces large fragrant clusters continuously throughout the season. Opens lively red turning to shell-pink. Desirable for mass planting. **\$1.25 each.**

CHATTER (Patent No. 739)—Unusually bright crimson, generous flower clusters, continuously in bloom, velvety firm petals. **\$1.25 each.**

FASHION (Patent No. 789)—Brilliant luminous coral flowers overlaid with gold, opening with wavy graceful petals. All season bloom, large clusters and singly. All American award for 1950. **\$2.00 each.**

GOLDLOCKS (Patent No. 672)—Rich golden yellow, buds are ovoid in shape, long lasting, hardy and vigorous. **\$1.50 each.**

PINOCCHIO (Patent No. 484)—A hardy plant producing an abundance of pointed buds of salmon-flushed gold, opening to miniature hybrid-tea like roses of soft clear pink, and in great clusters. **\$1.25 each.**

PINOCCHIO WHITE (Patent Applied for)—New outstanding floribunda, semi-double flowers of pure white with yellow stamens. Large 2 to 2½ inch flowers. **\$1.50 each.**

PERMANENT WAVE (Patent No. 107)—Large semi-double flowers of rosy-pink with cerise edges. Petals are waved permanently from bud stage to the finish. Vigorous and bushy. **\$1.25 each.**

How to Plant Your Roses . . .

To obtain success in planting roses it is important that they are properly planted. The roots should be trimmed back some and the hole dug large enough so that roots will not be crowded. Place the plant in the hole so that the bud union above the roots is at least two inches below the level of the ground, then fill in around the roots with dirt and water in well. After the water has seeped away, cut each cane back to about four inches above the level of the ground and cover the plant over completely with a mound of earth. After about six inches of new growth has forced through the mound of earth you can hoe the mound away gradually.
